Art Unit: 2145

DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eagle et al (U.S. 5,838,916) and further in view of Domenikos (U.S. 5,838,916).

As per claims 1,8,17 Eagle disclosed a method comprising: receiving a request for a portion of a file system by a client (col. 2, lines 61-63) identifying whether the portion is stored in a first location associated with portions of the file system that have been previously stored by the client (col.2, lines 36-64);

However Eagle did not disclose in detail determining whether the portion is stored in a second location associated with portions of the file system that were streamed to the client by a server.

In the same field of endeavor Domenikos disclosed, "A step of storing the potions of the file system according to a file or directory structure that is employed by the server. Accordingly, the cache memory device cache information that is representatives of the files for executing the

Art Unit: 2145

application program, as well as the information representative of the directory structure associated with these files (col. 4, lines 2-9).

It would have been obvious to one having ordinary skill in the art at the time of the invention was made to have incorporated a step of storing the potions of the file system according to a file or directory structure that is employed by the server. Accordingly, the cache memory device cache information that is representatives of the files for executing the application program, as well as the information representative of the directory structure associated with these files as taught by Domenikos in the method and system of Eagle to provide a system for deploying applications across the Internet that provides programs which execute quickly at remote sites.

- 4. As per claim 2,15 Eagle-Domenikos disclosed further comprising retrieving the portion from the server if not stored in the second location (Eagle, col. 7, lines 65-67 & col. 8, lines 1-4).
- 5. As per claim 3,13 Eagle-Domenikos disclosed wherein identifying further comprises associating portions of the file system used by the client during start-up with the first location (Eagle, col. 7, lines 11-16).
- 6. As per claims 4,14,19 Eagle-Domenikos disclosed wherein determining further comprises associating the second location with portions of the file system that were streamed to the client using a multicast operation (Eagle, col. 6, lines 54-66).

Application/Control Number: 09/466,113 Page 4

Art Unit: 2145

7. As per claims 5,22,23 Eagle-Domenikos disclosed wherein associating further comprises: monitoring accesses to a plurality of portions of the file system during start-up; retrieving the plurality of portions from the file system; and storing the plurality of portions in the first location (Eagle, col. 6, lines 54-66).

- 8. As per claim 6,20,21 Eagle-Domenikos disclosed wherein associating further comprises: retrieving a plurality of portions from the file system using multicasting; and storing the plurality of portions in the second location (Eagle, col. 6, lines 54-66).
- 9. As per claim 7,24 Eagle-Domenikos disclosed further comprising waiting for the portion to be streamed to the client if not stored in the second location (Eagle, col. 6, lines 54-66).
- 10. As per claim 9 Eagle-Domenikos disclosed wherein the first location is a non-volatile storage medium (Eagle, col. 3, lines 11-27).
- 11. As per claim 10,18 Eagle-Domenikos disclosed wherein the non-volatile storage medium is a flash memory device (Eagle, col. 3, lines 11-27).
- 12. As per claim 11 Eagle-Domenikos disclosed wherein the second location is a volatile storage medium (Eagle, col. 3, lines 11-27).

Application/Control Number: 09/466,113 Page 5

Art Unit: 2145

13. As per claim 12 Eagle-Domenikos disclosed wherein the volatile storage medium is a memory device (Eagle, col. 3, lines 11-27).

14. As per claim 16 Eagle-Domenikos disclosed wherein the contents of the second location are procured as a background operation (Eagle, col. 2, lines 57-64)

Response to Arguments

Applicant's arguments with respect to claims 1-24 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

- 15. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Adnan Mirza whose telephone number is (571)-272-3885.
- 16. The examiner can normally be reached on Monday to Friday during normal business hours. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jason Cardone can be reached on (571)-272-3933. The fax for this group is (703)-746-7239. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
